

System600

DJ monitor&Vertical twin 3way sound system

System600 is a 3-way sound system that reproduces the sound character of Kannonaudio.
And a DJ monitor designed by Kannonaudio for DJs who are particular about sound quality.
The System 600 is chosen by many small club and party organizers and cabin events.
The system is very small, can be carried in a passenger car, and even a 1set can area cover a party of 100 cloud.

Detail

Model606

Model 606 is a lightweight and compact design 2way vertical twin.
Bi-amp near field speaker.
Mid is two 5-inch speaker drivers placed vertically around the tweeter.
High is a 1 inch tweeter driver.
Pseudo-coaxial structure in which the sound image fits in the center of the baffle surface.

Model607

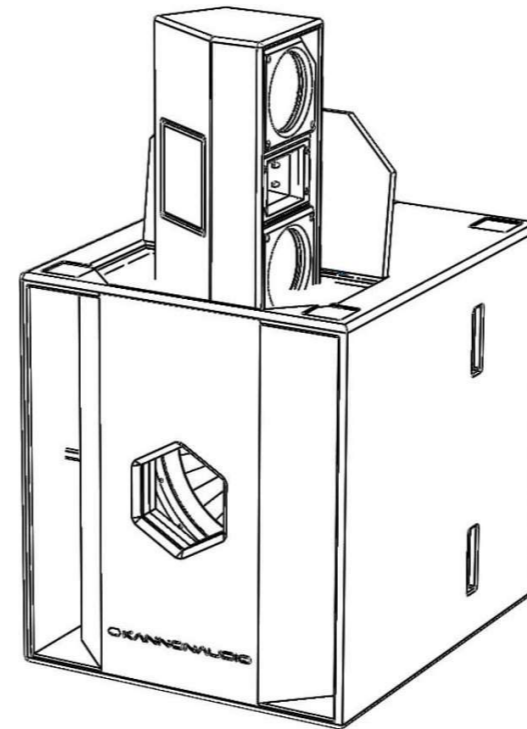

Model 607 is a cost performance DJ monitor that is compact and lightweight by changing two 8 inch mid drivers to one while keeping the basic design of Model 608.
2way bi-amp near field speaker.
Mid uses an 8 inch speaker driver.
High uses a 1.4 inch tweeter driver.

Model608

Model 608 is Kannon audio's DJ monitor flagship model that enables excellent sound image reproduction with a vertical twin structure.
There is no damage or tiredness to your ears, and you can concentrate on DJ play for a long time with the same sound quality as the dance floor.
2way bi-amp near field speaker.
Mid is two 8-inch neodymium speaker drivers.
High is a 1.4 inch neodymium tweeter driver.

Model615ASW

Model 615ASW is a dedicated Sub woofer designed for Model 606.
Adopting ASW type, designed so that even one unit can generate low end.

The unit used is 15 inches and can reproduce soft and heavy bass.

It is possible to store the Model 606 inside during transportation.

Model615P

Model 615P is an active Sub woofer designed by Kannaudio for Model 608.

The low-pitched model 608P uses a 15-inch inch neodymium speaker driver and uses a bass reflex type to reproduce sound pressure and deep bass.

With the built-in amplifier, you can build a high-quality DJ monitor sound with a simple operation.

Mpdel615PEX

Model 615PEX is an additional subwoofer unit for DJ monitor systems.
